End

After we have set a Start & End time,
we then **add words** about that section.

We **type in the text boxes**, a description of the section.

We describe what we see in the video in the text boxes.

There are **three text boxes** to enable categories of data.

For example, for Truth Detection, the first text box might be used for Shrugs found, the middle text box for Words Spoken, and the third text box for investigators' Conclusion on the section.

Double Shoulder Shrug

I'm his office manager. Maybe I can help.

Body language possibly indicating that she
is NOT willing to help

Review the Data We Created, then Add Record by pressing the **Add Record Button**

The screenshot shows a software interface with three input fields at the top: "Double Shoulder Shrug", "I'm his office manager. Maybe I can help.", and "Body language possibly indicating that she is NOT willing to help.". Below these fields, a list of recorded data is displayed. The first record shows the text "Double Shoulder Shrug", "I'm his office manager. Maybe I can help.", and "Body language possibly indicating that she is NOT willing to help." with timestamps "00:00:22" and "00:00:25". A second record is partially visible below it. To the right of the list, the text "Copyright 2020 Christopher Topalian All Rights Reserved" is visible. At the bottom right, there is a section labeled "#0" with two time fields: "00:00:27" and "00:00:29". A video player is visible at the bottom of the screen, showing a person's head and shoulders. A large black box with white text is overlaid at the bottom of the screenshot, providing instructions on how to add a new record.

Review the entry data that you typed.

Left Click to **Add Record**

We first review the time defined and data we typed.
Then we click the **Add Record Button**.
This will add a record at the bottom of the page.
Each new record is placed at the bottom of the list.
This enables an easy vertical scrolling viewing experience.
